

MONITOR, PREVENT, AND PROTECT WITH FORTIFI™ SYSTEM, THE NEWEST INNOVATION IN SMART COMMERCIAL REFRIGERATION FROM REGAL.

FORTIFI™ system powered by Perceptiv™ intelligence is a complete ecosystem of motors, sensors, hardware, and software designed to monitor and control the components that keep refrigeration equipment running. As a result, equipment stays online, running efficiently, reduces food safety reporting and maintenance costs are reduced.

The FORTIFI system can be built into the equipment coming from the OEM or retrofitted into almost any refrigeration unit through aftermarket services.

The time is now to connect and protect your equipment with FORTIFI system – the newest innovation from Regal.

APPLICATION CONSIDERATIONS

The proper selection and application of products and components, including the related area of product safety, is the responsibility of the customer. Operating and performance requirements and potential associated issues will vary appreciably depending upon the use and application of such products and components. The scope of the technical and application information included in this publication is necessarily limited. Unusual operating environments and conditions, lubrication requirements, loading supports, and other factors can materially affect the application and operating results of the products and components and the customer should carefully review its requirements. Any technical advice or review furnished by Regal Beloit America, Inc. and/or its affiliates ("Regal") with respect to the use of products and components is given in good faith and without charge, and Regal assumes no obligation or liability for the advice given, or results obtained, all such advice and review being given and accepted at customer's risk.

For a copy of our Standard Terms and Conditions of Sale, please visit <https://www.regalbeloit.com/Terms-and-Conditions-of-Sale>. These terms and conditions of sale, disclaimers and limitations of liability apply to any person who may buy, acquire or use a Regal product referred to herein, including any person who buys from a licensed distributor of these branded products.

MONITOR. PREVENT. PROTECT.

A COMPLETE SOLUTION FOR MAKING REFRIGERATION EQUIPMENT WORK SMARTER, NOT HARDER

UNDERSTAND CHANGES IN OPERATING CONDITIONS

FORTIFI™ system powered by Perceptiv™ intelligence system sends real-time notifications when the operating parameters of equipment have moved out of range; for example, change in temperature, fan speed, and motor power draw. This is especially important when maintaining corporate or regulatory compliance, not to mention virtually eliminating the need for troubleshooting and diagnostics.

REDUCE ENERGY CONSUMPTION

FORTIFI system gives users the ability to manually control the operation of fan speeds from anywhere there is an internet connection. This gives operators the much-needed control over energy consumption and performance of the equipment.

AVOID EXPENSIVE REPAIRS AND DOWNTIME

This system monitors equipment performance 24/7 with the power of Regal's Perceptiv intelligence. Because uptime translates to revenue, FORTIFI system then predicts mechanical issues before becoming larger, more expensive problems that could cause downtime or expensive service calls.

FORTIFI™ SYSTEM IS A COMPLETE SOLUTION FOR MAKING YOUR REFRIGERATION EQUIPMENT WORK SMARTER, NOT HARDER.

HERE'S HOW IT WORKS:

*Powered by Perceptiv™ intelligence

At Regal, we're always looking ahead. Now, we have the technology to look even further. Meet Perceptiv™ intelligence. Perceptiv intelligence is an interconnected matrix of smart, digital solutions that have the potential to empower and elevate everything in the Regal universe.

These are the enabled components and products that bring Perceptiv™ services to life. From monitoring the FORTIFI systems and motors, to sensors to QR tags – our hardware keeps you connected to the cloud to maximize benefits of your preventive maintenance activities all working together in perfect harmony.

MULTIPLE SERVICE PLANS AVAILABLE*
